AJALA OLUWATOBI PHILIP

Software Engineering Student | Full-Stack Development | Lagos, Nigeria

ajalaphilip2007@gmail.com | +234 9134775383 | github.com/Philip8-hue

Portfolio: Philip8-hue.github.io/portfolio

PROFILE

Third-year Software Engineering student at Anchor University with a 4.64/5.0 CGPA. Builds full-stack web applications with TypeScript, JavaScript, Python and relational databases, with project experience in REST APIs, authentication, access control and API testing.

EDUCATION

Anchor University, Lagos | B.Sc. Software Engineering | Third year

CGPA: 4.64/5.0 | **Coursework:** Data Structures & Algorithms, Database Systems, Object-Oriented Programming

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Application development: React, Node.js, Express, Django, HTML, CSS, REST APIs, JWT authentication

Data and tools: PostgreSQL, Supabase, Prisma, MongoDB, MySQL, Git, GitHub, Vercel, Postman

Familiarity: Linux/Unix, AWS, Docker, CI/CD and distributed systems

SELECTED PROJECTS

Anchor University Sports Hub

TypeScript, JavaScript, Express, Prisma, PostgreSQL, Supabase, Vercel

school-sport-hub.vercel.app | github.com/Philip8-hue/School-sport-hub

- Built a university sports platform with player and club profiles, fixtures, results, league tables and an editable admin workspace.
- Implemented player, coach and fan dashboards with admin-approved profile links, team access and saved follows.
- Added saved fantasy squads, deadline locks, sport-specific scoring and leaderboards; migrated sports data to Supabase and added API tests for permissions and scoring.

Back-to-School AI Assistant | Python, Django, PostgreSQL, OpenAI API

- Built a study assistant for curriculum summaries and personalised study schedules, storing user history and learning progress in PostgreSQL.

Full-Stack E-Commerce & Transaction Platform | React, Node.js, Express, MongoDB

- Built product catalog and shopping-cart flows with REST API endpoints, JWT authentication and bcrypt password hashing.

EXPERIENCE

Software Engineer | B-Jay | 2020 - Present

- Combined software engineering work with laptop fault diagnosis, hardware and software maintenance, and network setup for companies and polytechnics.

Freelance Web Developer | Self-Employed, Remote | 2024 - Present

- Developed responsive React and WordPress websites; gathered client requirements and planned layouts, database needs and delivery milestones.

CERTIFICATIONS AND COMMUNITY

Google IT Support Professional Certificate | Google / Coursera, 2024

Responsive Web Design Certificate | freeCodeCamp, 2024

University hackathon teamwork and peer support in Python programming through the Software Engineering Student Body.
